

Occupational Health and Safety

OHSAS 18001 (officially 'BS OHSAS 18001:2007') is an internationally-applied British Standard for occupational health and safety management systems. It exists to help all kinds of organizations put in place demonstrably sound occupational health and safety performance. It is a widely recognized and popular occupational health and safety management system.

CTI provides occupational health technological services to manufacturers in China. The reports issued by our Company can be used for governmental administrative examination and approval, supply chain management and self improvement. We provide a one-stop service on occupational health to our customers including testing, assessment, consultation and training as well as governmental administrative examination and approval.

- ◆ Public health service
- ◆ Occupational hygiene Service
- ⇒ Occupational hazardous factors test on workplace
- ⇒ Occupational hazardous pre-assessment/ control effect assessment/ present situation assessment on the construction project
- ◆ Safety assessment service

The certification of OHSAS18001, Occupation Health Safety Management System, can be applied by organisations voluntarily. However, some health and safety requirements are compulsory, we are able to certify organisations to these also.

Striving "towards zero accidents" can be a challenge for any organization

- OHSAS18001 provides a system to identify OH&S hazards and minimize health and safety risks
- It makes sure that all elements to effectively manage health and safety are clearly defined
- It gives you the techniques to identify potential causes of accidents within the workplace
- It helps you to improve employee awareness of risks

Organizations need to stay up-to-date with legislation and remain compliant, as breaches can lead to fines and prosecutions

- OHSAS18001 makes sure you take account of legal requirements when setting up, implementing and maintaining your OHSAS 18001 system
- It ensures you commit to complying with applicable legal requirements
- It makes you communicate relevant information on legal and other requirements to employees and interested parties

A poor health and safety record can quickly damage an organization's reputation with both customers and investors

- OHSAS18001 shows that health and safety is a priority
- It makes sure you have appropriate measure to protect your staff
- It reassures stakeholders a best practice system is in place
- It makes sure you continually improve your health and safety performance

High absenteeism is often an issue for organizations and difficult to manage without a clear process in place

- OHSAS18001 helps you implement policies and procedures that can help you tackle absenteeism
- It makes sure you put in place clear processes for everyone to understand and follow
- It shows your employees your commitment to keeping them safe

- Reduced incident and accident rates
- Improved performance monitoring and accident reporting
- Better control of OH&S risks
- Decrease in overall costs of accidents
- Decrease in insurance premiums

- Improved levels of compliance to health and safety legislation
- Reduced likelihood of fines and prosecutions, which in turn can lead to less HSE or local regulator visits and lower insurance premiums, providing financial benefit

- Improved reputation and stakeholder satisfaction – positively presenting your organization for tenders and investment opportunities
- A competitive advantage to grow your business

- Reduced absenteeism and improved employee morale, leading to increased productivity
- Greater involvement and commitment from employees and the management team, resulting in improved health and safety culture
- Improved communication and training
